

# Department of Information Technology & Computer Science

The Department of Information Technology & Computer Science, under the leadership of **Dr. Seema Rahul**, Head of the Department, successfully conducted a series of academic, co-curricular, and skill development initiatives during the academic year 2024–2025. The department remained committed to shaping digital futures by equipping students with industry-relevant knowledge, practical skills, and career-oriented training.

The academic year was marked by a vibrant array of Student Development Programs organized in association with **ExcelR**, aimed at enhancing students' employability and technical competencies.

## Student Development Programs

- 1. Digital Marketing (20th June – 10th July 2024)**  
A 30-hour online live program provided students with practical exposure to digital marketing tools, strategies, and real-world applications.
- 2. Sales force (15th July – 2nd August 2024)**  
A 15-day program introducing students to Salesforce CRM concepts, architecture, and application development.
- 3. Project Excellence – Mastering Minor and Major Projects (5th – 27th August 2024)**  
Focused on effective project planning and execution through real-world case studies.
- 4. Data Structures and Algorithms (19th August – 6th September 2024)**  
Designed to strengthen problem-solving and programming skills essential for campus placements.
- 5. Cracking Coding Interview (9th – 27th September 2024)**  
Enhanced coding proficiency and placement readiness.
- 6. Sales force Developer (23rd September – 15th October 2024)**  
Provided hands-on experience in Apex programming, Visualforce, and Lightning Components.
- 7. Cracking Accenture Coding Interviews (23rd October – 13th November 2024)**  
Focused training to prepare students for corporate coding interviews.
- 8. Landing 10+ LPA Jobs: Industry Secrets Unveiled (12th November – 2nd December 2024)**  
A 30-hour live program guiding students towards high-paying career opportunities.
- 9. Business Intelligence using Advanced Excel & Power BI (27th February – 20th March 2025)**  
Provided practical insights into data analysis, visualisation, and BI tools.
- 10. Internet of Things (24th March – 14th April 2025)**  
Delivered hands-on exposure to IoT concepts and applications.
- 11. ACE Coding Interviews: DSA Mastery with Java (19th May – 6th June 2025)**  
Empowered students with advanced coding and interview preparation skills.

The department also recorded commendable results in T.Y. B.Sc. (IT) and T.Y. B.Sc. (CS), reflecting academic excellence and consistent efforts by faculty and students.

The Department of Information Technology & Computer Science experienced a dynamic and productive academic year filled with innovation, skill development, academic excellence, and student achievements. Through strategic collaborations with industry partners and a strong focus on practical learning, the department continues to prepare students to excel in the rapidly evolving digital landscape.
