Report on Certification Programs at Vikas College of Arts, Science & Commerce in Collaboration with Infosys Springboard for the academic year 2022-23

Vikas College of Arts, Science & Commerce, in partnership with Infosys Springboard, has successfully conducted numerous certification programs for students, completely free of charge. This initiative is part of Infosys' Corporate Social Responsibility (CSR) efforts, aimed at enhancing students' skills and knowledge in various domains.

The process begins with students registering for the program through the college. Upon registration, they are provided with login credentials that grant them access to the course material. The courses span a wide range of subjects, helping students develop both technical and soft skills, preparing them for future career opportunities.

For evaluation, students must secure a minimum of 70% to be eligible for certification. In case they do not achieve the required score, they are given the opportunity to retake the test, ensuring that all students have a fair chance to succeed.

This collaboration has empowered students by providing them with valuable industry-recognized certifications, boosting their employability and skillset.

Name of the program: Professional Microsoft Azure Devops program

Date:

➢ Students can complete the certification program at their convenience, with the flexibility to choose **different dates** that fit their schedules.
➢ They have the freedom to log in and access video lectures anytime, from anywhere, ensuring a seamless learning experience that adapts to their needs.

List of students participated and completed the course:

Sr. No.	Name of Students	Sign
1.	Harishnu Narayankar	Hari

Coordinator Ad -on Courses

Curriculum:

- ➤ **Introduction to DevOps and Azure DevOps**: Understanding DevOps principles and practices. Overview of Azure DevOps services and tools.
- ➤ **Version Control with Git**:Setting up and managing repositories in Azure Repos. Branching strategies and pull request workflows
- ➤ **Continuous Integration and Continuous Deployment (CI/CD):** Configuring build pipelines using Azure Pipelines. Implementing release pipelines for automated deployment.
- ➤ **Infrastructure as Code (IaC):** Introduction to IaC concepts using Azure Resource Manager (ARM) templates and Terraform. Automating infrastructure deployment and management.
- ➤ **Monitoring and Logging:** Setting up application monitoring with Azure Monitor and Application Insights.
- ➤ **Security and Compliance in DevOps:** Best practices for securing the DevOps pipeline.

Duration:

1. The program was conducted over a 15-day period, providing a structured time frame for learning.

2. Completion of the program depends on each individual student's pace, allowing them to finish the course as per their own schedule within the given time
