Abstract:

Excess of fluoride in water causes health hazard to the natural environment. The removal of fluoride was attempted using natural materials such as Corn husk powder and Green chickpeas husk powder. Each material was set up in a column for a known volume and the defluoridation capacities of these materials were studied with respect to time. According to the maximum defluoridation capacity these materials were added proportionately to the vertical column. Then fluoride was passed through the column and the variation of fluoride removal for a known rate of flow was studied. Correlation analysis of defluoridation capacity with the time was done and an attempt has been made to classify them accordingly. The water samples were collected in such place namely kolwadi near to madh of pune district. The defluoridation is done with the corn husk powder and green chickpeas husk powder and then the results were compared. Filtration with corn husk and green chickpeas husk powder reduces the fluoride content for the samples from the above place. .

Keywords:

Fluoride removal, Corn husk powder, Green chickpeas husk powder.

ABSTRACT

Mutual Fund is a vehicle that attracts small and medium investors, thus strengthen the capital market. There are many reasons to invest in mutual funds such as dividend declarations, tax benefits, lesser risk, and value of assets, cost etc. The current scenario is of modernization. People are becoming modern and more aware and literate day by day in every aspects whether that is of shifting towards cashless, using smart phones for banking, shopping etc, getting independent or if it the case of selection of Investment options. In terms of investment earlier Bank fixed deposits and saving account, PPF used to be favorites investment avenues among investors. But investors are now understanding that to beat inflation investment in these traditional avenues is not enough and one has to adopt diversification to meet out the different goals of their life. In the present scenario mutual funds are the most vivacious investment avenue among all the various available options. One can explore investment in mutual funds which in turn will offer them exposure to various asset classes according to their selection on the basis of various parameters like their age, financial position, risk tolerance and return expectations. Mutual Funds provides liquidity, professional management, tax advantage and better returns and having plethora of schemes according to the need of investors to meet their financial goals. The objective of the research paper is to find out the Investors awareness level towards Mutual Funds Investment. The study is based on primary source of data. This research study is descriptive in nature. The primary data was collected through a questionnaire designed for the study. A structured questionnaire is used to collect the primary data from 50 respondents. The data are analyzed using percentage analysis. This is the data which has been collected for particular research study with reference to Vikhroli Area. The findings shows that majority of investors have heard about mutual funds but still a important fraction of them have not initiated to investment because of having lacking in full knowledge of mutual funds. The data further reveals that majority of respondents are showing preference towards investment in mutual funds in near future as to get better returns. The paper suggests that companies and government should come forward in getting investors more literate and train their advisors in a way so to build more confidence among investors for taking initiative to invest in mutual funds. Timely and right information should be provided to their

1

customers by way of different communication modes. It will help the customers come to know about the latest trends in the market.

ABSTRACT

The study of my research is focused around the Goods and Services tax, and its implementation in India. I studied the various aspects of GST and how it has impacted the restaurant industry. The focus of my research was to see the impacts of the implementation of GST on the restaurants in Mulund. GST has left several impacts all over the country since its implementation. Here we will discuss the various impacts of GST on restaurants to get a clear insight of the case. GST has reduced tax burden for many but has also come as a surprise for some. The sudden change of the taxation system has led to several issues and has impacted the economy of the country. Many studies have been done on the topic on GST and its impact on various sector. This paper focuses mainly on the awareness about the GST among the small and mostly restaurants in Mulund city. The study adopts descriptive analysis method carried on basis the responses to the questionnaires collected from the accountant & owners of restaurants. This research attempts to provide basic details of GST and GST returns in brief, analysis of the questionnaires, conclusion driven there on and provides with viable suggestions at the end of the study. Interestingly, the study has found that a majority of the respondents are aware of the new tax reform; a large number of those traders are still to be covered under tax payment.

The study concludes on the basis of the literature that GST's impact will be having both positive and negative implications on food sector i.e., higher the tariff on restaurants (where room tariff more than 7500) have 18% tax which is regressive in nature which reduces the frequency of people visiting to restaurants and the lower tariff hotels with 5% GST have benefited.

SUMMARY OF TRAINING REPORT

This report describes a brief description of the work that has been carried out by me in the laboratory during training at Reliance life Science during my training period from 15th February to 25th February 2021. I have worked with 5 departments i.e Clinical pathology, Biochemistry, Hematology, Immunology and Medical Microbiology.

In **Clinical Pathology section** I have learn how to operate (Clinitek 500) a semi-automated urine chemistry analyzer instrument which gives numbers of the tests Glucose, Bilirubin Ketone, Protein, Urobilinogen, Nitrite, Leukocytes, colure of the urine and pH etc.

In **Biochemistry section** was fully automated machine (DADE DIMENSION) which give the result of Glucose, Uric acid, Cholesterol and Triglyceride.

In **Hematology section** I have learned how to operate these machines (CBC LH7N, ESR analyzer). The test which conduct in this machine; these are RBC, WBC, Platelets and clotting factors.

In **Immunology section** CLIA and XPT (CHEMILUMINESENCE) in this section I have gained the knowledge of how to operate the instrument (ADVIA CENTAURE) conduct hormones test i.e T3, T4, TSH, etc. The machine is fully automated I used to only insert the required amount of serum samples and after sometime I used to get the result of the test.

In **Molecular Microbiology section** I have learned SARS Covid sample collection, extraction of covid samples and PCR of the covid samples.
